ABSTRACT

Federal funds to black colleges reached a new high of $275 million in FY 1974 according to the 1974 survey by the Federal Interagency Committee on Education (FICE). The report's tables summarize: the number of black colleges, their enrollment, and federal funds received for FY 1969 through 1974; the total federal obligations to colleges and universities by agency; the distribution of federal funds among black colleges; the top ten black college recipients of federal funds; federal support to predominantly black colleges by control and level; federal obligations to all universities and colleges, by agency and type of activity, FY 1974; federal obligations to black universities and colleges, by agency and activity, FY 1974; and federal funds obligated to black universities and colleges, by state, institution, agency, and type of activity, FY 1974. FEDERAL AGENCIES AND BLACK COLLEGES FY 1974

Federal funds for black colleges reached a new high of $276 million in FY 1974. This figure represents an increase of $26 million, which is 10 percent more than the 1973 total of $250 million. Federal funds going to all colleges and universities totaled $4.8 billion, an 8 percent increase over 1973. Funds for black colleges represent 5.7 percent of this total.

These figures come from the sixth annual survey of Federal aid to black colleges by the Federal Interagency Committee on Education (FICE). Table 1 summarizes data for each year of the survey.

While funds were increasing, so was enrollment in black institutions. In 1974-75, 253,000 students attended black colleges, an increase of 2.3 percent over the previous year. Black college enrollment constituted 7.5 percent of students enrolled in all institutions of higher education.

Among the other highlights of the 1974 survey are these:

- The Department of Health, Education and Welfare contributed 83.5 percent of total Federal funds for black colleges in FY 1974. Of the $234 million HEW total, the Office of Education provided $178 million to black colleges, $23 million more than in FY 1973. OE support for all institutions decreased by more than $100 million in FY 1974. The Public Health Service agencies provided $55 million to black institutions, $22 million more than in FY 1973.

- Data on OE's Basic Educational Opportunity Grants (BEOG's) program are included in the study for the first time. The total for 1974, the first year of operation for BEOG's, was $22 million in awards to students attending black colleges or 7.5 percent of the $287 million in awards to students attending all colleges. The addition of this program to the survey accounts for 85 percent

of the dollar increase in Federal funds for black colleges in 1974.

- Outside HEW, the primary sources of Federal support were the Department of Agriculture and the National Science Foundation, which provided $17.4 million and $8.2 million respectively to black colleges in FY 1974. Office of Economic Opportunity support decreased from $6.9 million in FY 1973 to $4.6 million in 1974, although the 1974 amount constitutes almost half the agency's total awards to all institutions of higher education. Table 2 shows funds allocated by each agency for black and all institutions.

- Seventy-six of the 112 black colleges in the study received more than $1 million each from Federal agencies (See Table 3).

- One-third of the total funds went to the ten institutions listed in Table 4. At the top of the list is Meharry Medical College, which received more than $25 million.

The 64 private colleges in the study, which enrolled 25 percent of all students attending black colleges, received nearly 57 percent of the total funds in FY 1974 (Table 5).

It is important to note that the manner by which FICE conducted this survey changed in 1974. In previous years, each Federal agency completed a questionnaire form for each of its programs which provided assistance to higher education institutions. FICE staff then checked and tabulated the responses. In 1974, the National Science Foundation supplied the required figures via printouts from its annual survey, Federal Funds for Colleges, Universities, and Selected Non-Profit Institutions, which assembles data from machine tapes provided by Federal program offices.

These differences in the method of data collection mean that data from the 1974 survey are not precisely comparable to surveys of previous years. Data are no longer available on a program-by-program basis, although agency, institutional, and program area figures are included. For agencies or programs not included in the NSF survey, the FICE staff obtained data by contacting the appropriate offices. In some cases estimates were necessary; these are indicated on Table 2, which shows FY 1974 Federal funds awarded to black and all colleges by all the agencies traditionally surveyed by FICE. The figures in Appendices A, B and C are only for the agencies and programs included in the NSF survey.

1/ Estimate.

2/ Includes estimate for ROTC and NESEP.

3/ Includes estimate for National Direct Student Loans.

4/ Excludes the Congressionally appropriated HEW line item for Howard University which amounted to $43.4 million in FY 1974.

5/ Not included in the OE or HEW total are Federally guaranteed loans from private lending institutions and subsidies paid to lending institutions. Not included in either OE or DHUD totals are private market construction loans obtained by colleges and universities with the help of Federal subsidies. The subsidies are included, however, since they are Federal funds received by colleges and universities.

6/ The amount of VA money for institutions consists of a $3.00 reporting fee per veteran enrolled. By far the most assistance provided by the VA for educational purposes is the educational benefits paid directly to veterans enrolled in eligible programs.
